

PLC Alarm Messaging via SMS

Send alarm SMS to service personnel in the event of a malfunction

- M1000 is a Smart Modbus SMS/GSM Gateway for industry M2M applications.
- It is convenient for users to apply to M2M applications with the host like PC, PLC, HMI and PAC via Modbus RTU communications.
- The M1000 will be polled by PLC, and send out alarm via SMS when coils or registers value is out of range.
